

Entropy as a toy. On the basis of the balance and the disorder leading to what is known as a "heat death", there is a series of intermediate grades on its way. But what happens when the maximum disorder leads to the field of equilibrium? That is definitely what is embodied in each of these orgasms, starting from the idea of an orgasm as little death and pornography in itself as an example of chaos.

Aesthetically unsightly turns into beauty and balance. Within that State of expiration involves materials that simulate fluids and collaborate, not in a State of disorder - as you would expect - but, on the contrary, in the pursuit of an absolute balance.

But this type of work has, in addition, a link of union with earlier ones that we can not ignore. Such is the case of the marinas of the search series, made years ago, and where entropy is present through different views from cliffs. Water will be a common element between both jobs and essence of the same, but will yield to new paths as a symbol of life, fertility, and consequently, of the erotic.

Everything is studied to achieve beauty and perfection. The porn stars become muses and canons of beauty of modernism, with a touch of classic style. The materials surrounding them are fluid resembling silk botticellescas. And all this for a moment and forever, will converge in a provision of permanent **ENTROPY**.
